

TWB Designs is now partnered with Eco Waste Solutions (EWS). EWS manufactures a range of safe and environmentally sound equipment for disposal of materials generated by Defence and Law Enforcement Agencies including: demilitarization, and destruction and disposal of contraband, narcotics, and contaminated or biologically active materials.

**ECO Mobile** – This mobile waste incinerator is permanently housed in a 20' or 40' ISO shipping container. The “Plug & Play” design allows the unit to be setup and operational with minimal assembly, within hours for rapid deployment or transportation to another location. These self-contained, modular units are equipped to operate in any climate and will meet any global air emission standard.

**ECO Model** – This customer sized unit can process up to 10 tonnes of unsorted waste per day, including large bulky items. This model operates in a one batch-per-day fashion and has an extremely low labour requirement.
